

How to install McAfee Endpoint Security

Step 1: Go to the Academic Software page of McAfee Antivirus and click on the button 'Download McAfee Endpoint Security 10.7.0' to download the program. This will download a zip file containing the installer files.

Step 2: Right click on the zip file and click 'Extract All'. Extract the file in your downloads folder (or a temporary folder of choice, e.g. on your desktop).

Step 3: Go to the folder you just extracted and double-click the file setupEP.exe to open it.
