

4.1.4 Dedicated graphics card driver update

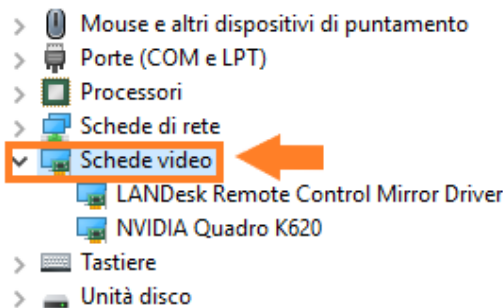

Starting from the bSuite 4.0.0 version, it is required to update the drivers of the dedicated graphics card to the latest version available.

To do this you need to:

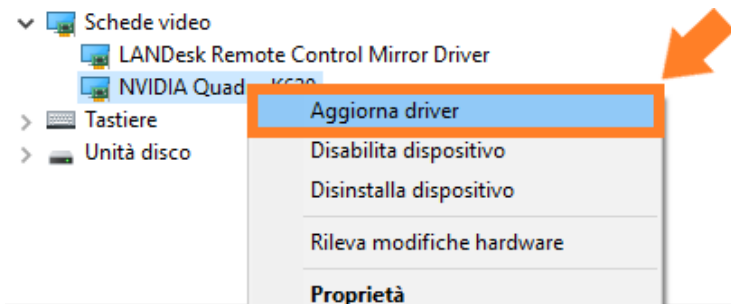

- 1 open the "Control Panel"
- 2 select the item "Device management"

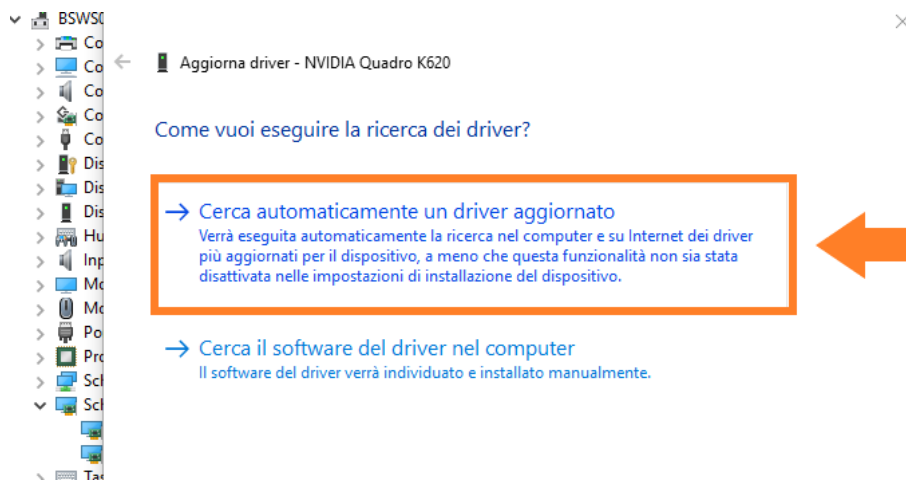

- 3 expand the "Video Cards" section

- 4 select the dedicated graphics card with the right mouse button and select the option "Driver update"

- 5 Select the option "Automatically search for an updated driver".
ATTENTION: the PC must be connected to the Internet

- 6 Wait for the verification of updated drivers and any installation to finish successfully

4.1.5 Nvidia graphics card configuration

NOTE: if there are several monitors connected to the PC, make sure that the same text size is set for each of them.

Risoluzione dello schermo

1920 x 1080 (scelta consigliata)

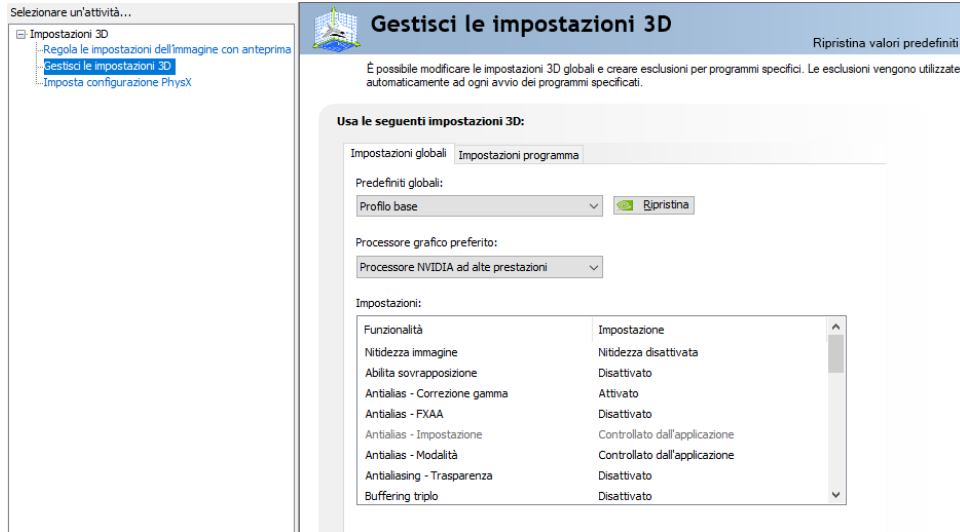

Steps to be performed in the "NVIDIA Control Panel":

- 1 In the "Adjust image settings with preview" section, enable the parameter "Use advanced 3D image settings"

- 2 Click on the "Open the page" link next to the "Use the advanced 3D image settings" parameter

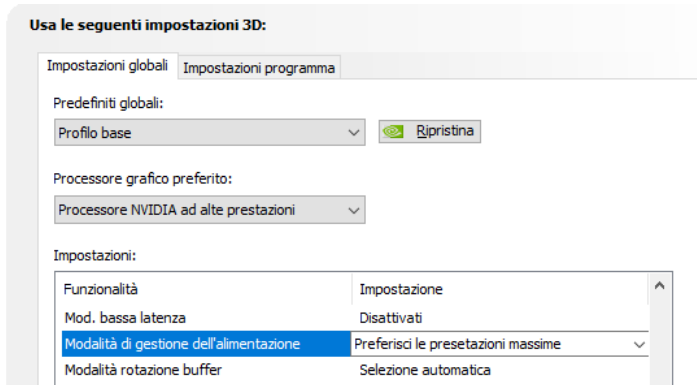

3 Select the "Base Profile" item in the "Global Presets"

4 Press the "Reset" button to reset the default values (if one or more of them had previously been changed)

5 In case of a laptop, select the "High performance NVIDIA processor" under "Preferred graphics processor"

6 In the list below "Settings:", search for the parameter "Power management mode" and set the value "Prefer maximum performance"

7 Apply the changes made by clicking on the "Apply" command (button at the bottom right)
